DNA TT

NFC Inlay and Label

IC Speciality

Identiv's ID-Safe-A572-NTAG® DNA 424TT is a versatile solution for mass market applications like retail, electronics, food and beverages, and pharma. It utilizes the secure NXP NTAG® 424 DNA TagTamper chip, offering advanced security for IoT and NFC applications, with addition to a tamper-loop feature. The tags leverage the native security mechanism within the attack-resistant certified chip and are designed for use in secure IoT applications, including anti-counterfeiting for brand protection, document authentication, secure supply chain traceability (i.e., product origin and provenance), authorized data access, and trusted customer engagement, like loyalty programs. With its tamper-loop, it also detects the current opening status of the tagged item.

The ID-Safe-A572-NTAG®424 DNA TT takes secure product authentication to another level and works with all NFC devices, offering real-time authentication and enhanced privacy features.

Key Features

- For use in secure IoT applications, including **advanced anti-counterfeiting** for brand protection, **authorized data access**, and **trusted customer engagement**
- Unique data authentication upon every tap, using up to **5 customer-defined AES keys** for **advanced cryptographic functionalities**, including CMAC with optional encrypted data, SUN for secure authentication, mutual authentication, and secure access to NDEF and extra data files
- IC NXP NTAG® 424 DNA TagTamper is hardware-certified against **Common Criteria® EAL4 for hardware and software**
- Once-opened and current-status detection by **tag tamper feature**
- Available as **dry inlay, wet inlay, or label**
- Available also with **NXP NTAG® 22X DNA StatusDetect**

Frequency

- NFC 13.56 MHz

Antenna Dimensions

- 100 x Ø25 mm

Chip

- NXP NTAG® 424 DNA TagTamper

International Standards

- NFC Forum Type 4 Tag
- ISO/IEC 14443A

Industries

- Beauty and personal care
- Food and Beverage
- Pharma and Healthcare
- Smart Packaging
